}
```

PART 2 — Fix Sign In / Sign Out in Header to use translations

In `src/components/Header.tsx`, replace the two hardcoded English strings:

- The span containing `Sign Out` → replace with `{t('nav.signOut', 'Sign Out')}`
- The span containing `Sign In` → replace with `{t('nav.signIn', 'Sign In')}`

Make sure `useTranslation` is imported and `const { t } = useTranslation();` is declared in the component. These keys now exist in all locale files from Part 1.

PART 3 — Fix language dropdown to show all 18 languages

In `src/components/LanguageSwitcher.tsx`, replace the languages array with this complete 18-language list:

```typescript
const ALL_LANGUAGES = [
  { code: 'en', name: 'English', dir: 'ltr' },
  { code: 'es', name: 'Español', dir: 'ltr' },
  { code: 'fr', name: 'Français', dir: 'ltr' },
  { code: 'de', name: 'Deutsch', dir: 'ltr' },
  { code: 'ar', name: 'العربية', dir: 'rtl' },
  { code: 'tr', name: 'Türkçe', dir: 'ltr' },
  { code: 'it', name: 'Italiano', dir: 'ltr' },
  { code: 'pt', name: 'Português', dir: 'ltr' },
  { code: 'nl', name: 'Nederlands', dir: 'ltr' },
  { code: 'pl', name: 'Polski', dir: 'ltr' },
  { code: 'ru', name: 'Русский', dir: 'ltr' },
  { code: 'ja', name: '日本語', dir: 'ltr' },
  { code: 'ko', name: '한국어', dir: 'ltr' },
  { code: 'zh', name: '中文', dir: 'ltr' },
  { code: 'sv', name: 'Svenska', dir: 'ltr' },
  { code: 'ro', name: 'Română', dir: 'ltr' },
  { code: 'hi', name: 'हिन्दी', dir: 'ltr' },
  { code: 'id', name: 'Bahasa Indonesia', dir: 'ltr' },
];
```

Also update DropdownMenuContent to be scrollable: `<DropdownMenuContent align="end" className="max-h-80 overflow-y-auto">`

Make sure the dropdown iterates over ALL_LANGUAGES (not an old hardcoded 5-language array).

PART 4 — Improve the hero background

Replace the current hero background with this warmer design:

- Hero section className: `relative overflow-hidden min-h-[460px] flex flex-col items-center justify-center py-16 bg-[#FDF6EE]`

- Inside the hero section, as the first child, add this decorative glow div: `<div className="absolute inset-0 bg-[radial-gradient(ellipse_80%_60%_at_50%_0%,rgba(234,88,12,0.07),transparent)] pointer-events-none" />`

- Remove any existing background photo or image from the hero

- Make the Check Safety button fully solid with strong contrast: ensure it uses `bg-primary text-white font-semibold` and is NOT transparent or washed out. If the button currently has low opacity or a light fill, fix it so it's a strong solid coral-red.

- Keep the pet emoji row, headline, tagline, TrustBar, PetToggle and FoodSearch exactly as they are — only change the background and button styling

PART 5 — Remove the Popular search pills

In `src/pages/Index.tsx`, inside the `{!result && !isLoading && (` block, remove the div that contains:

- The `{t('common.popularSearches')}` label
- The `.map()` over `["Chocolate", "Grapes", "Chicken", "Peanut Butter", "Bananas", "Avocado"]` pill buttons

Keep TrendingIn2026 and everything else in that block. Only the pill buttons and their label should be removed.

Do not change any Supabase edge functions. Do not remove TrendingIn2026. Apply all 5 parts fully.
